

A PUBLIC PANEL DISCUSSION

# WEATHERING THE STORM

## NAVIGATING EXTREME WEATHER IN NEWFOUNDLAND AND LABRADOR

SHERATON HOTEL NEWFOUNDLAND  
2PM | MAY 28, 2023 | ST. JOHN'S, NL

The Canadian Meteorological and Oceanographic Society (CMOS) is inviting the public to a **free** panel discussion for residents concerned about weather-related emergencies. Join us in-person or online as we explore the science behind predicting and tracking severe weather patterns, discuss tips on developing effective response plans for natural disasters, and examine how extreme weather events in Newfoundland are linked to climate change. As Newfoundland is no stranger to the wrath of nature, this event aims to equip the public with practical advice and strategies for staying safe during extreme weather events.

Visit [www.cmos-scmo.ca/publicpanel](http://www.cmos-scmo.ca/publicpanel) or use the QR code at the left to visit our website and register for this free event. Please note that registration is required whether attending in-person or virtually.
